Example

9.8 + 2.12

Example

8 – 1.65

Example

1.159 • 0.03

Example

0.88 ÷ 1.6

Line up the decimal point

Then, add as with whole numbers.
You may have to write Zero as place holders.

Bring down the decimal point.

Multiply as you would multiply whole numbers.

Then, place the decimal point

The number of decimal places in the product is the total number of decimal places in the factors.

Line up the decimal point

Then, subtract as with whole numbers.
You may have to write Zero place holders and borrow.

Bring down the decimal point.

Move the decimal point in the divisor and the dividend until the divisor is a Whole number

Place the decimal point in the quotient

Directly above the point in the dividend.

Divide as you would divide whole numbers.
Operations with Decimals

Subtract Decimals

- 

Add Decimals

+ 

Divide Decimals
