Step 2: Find Sale Price

Try this: A $40 shirt is on sale for 35% off. What is the sale price?

- Subtract the discount from the original price.
- Make sure your answer looks like money!

Example 2:
A $72 necklace is on sale for 45% off. What is the discount? What is the sale price?

- Change percent into a decimal by moving the decimal two places to the left.
- Multiply money by percent.

Discount _______________
Sale Price _______________

Examples
Step 1: Find Discount
Calculating Discount and Sale Price

Example 1:
A $95 pair of jeans is on sale for 25% off. What is the discount? What is the sale price?

Discount _______________
Sale Price _______________

Try this: Find 35% discount on a $40 item.
